INTRODUCTION

Thank you for ordering the NEW TSLOTS catalog. The TSLOTS catalog has been enhanced to include new profiles, accessories, TSLOTS brackets and many other parts designed to complete your project. TSLOTS is a product offering of Bonnell Aluminum, an aluminum extrusion company that provides stock and custom extrusions. If your project calls for a custom extrusion, we can provide it for you too!

The concept behind the T-Slotted aluminum extrusion is to make assembly of structures faster and easier than using welded steel. That's because the main component of the system is the TSLOTS design: insert a T-Nut and fastener into a T-Slot and tighten. It's that simple. No welding or grinding required. All you need to tighten your TSLOTS design is a few simple hand tools.

When you are done, you have a durable, strong, lightweight structure that's functional and attractive. The high-strength extruded aluminum profiles have a clear and black anodize surface that is scratch and corrosion resistant. Your structure never needs painting and is maintenance free.

PRODUCT WARRANTY

All Bonnell Aluminum (TSLOTS) products are guaranteed to be free of actual defect in material and workmanship for (1) full year from the date product was shipped from the factory. This warranty is limited to replacing or repairing, at Bonnell's option, F.O.B. Bonnell Aluminum, any part which, upon Bonnell inspection, is found to have a defect in material and/or workmanship. Bonnell Aluminum in no event shall be liable for indirect or consequential damages arising out of the use of Bonnell Aluminum products. Components purchased by Bonnell Aluminum for inclusion by Bonnell Aluminum shall be warranted only to the extent set out above and/or to the guarantee or warranty, if any, made by the supplier of said component.

No warranty is made by Bonnell Aluminum, express or implied, that Bonnell Aluminum products as used in a customer's design and specifications are fit for that customer's specific purpose. Apart from the above express warranty, there are no warranties, express, implied or statutory, including, without limitation, warranties of merchantability and fitness for a particular purpose, which extend beyond the description on the face hereof.

All product is shipped via best carrier, unless customer specified, F.O.B. Clearfield, Utah.

» *Returned unused product will be subject to a 20% restocking fee.*

1 TECHNICAL DATA

Technical Data & Information

EXTRUSION SPECIFICATIONS

Alloy – 6560 or equivalent*, T6 Temper

Yield Strength (0.2% proof test) – 172 mpa = 25 ksi

Tensile Strength (.02% proof test) – 206 mpa = 30 ksi

Elasticity (E) – approximately 10,000 ksi

Hardness – 12+ Webster Model "B"

Flatness – .004" per inch of width

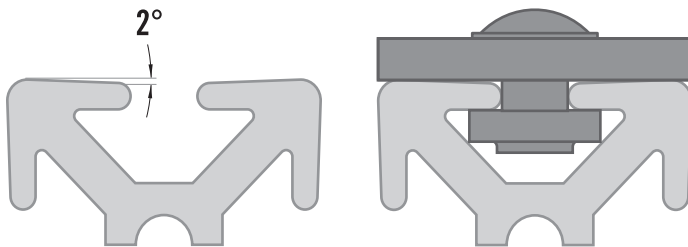

Straightness - .0125" per foot of length, not to exceed .120 inches over 20 feet of length

Twist – Twist per foot of length does not exceed .25° and total twist over 20 feet of length does not exceed 1.5°

**As an extruder, there are many other alloys that we can extrude. If your application calls for a different alloy, let us know and we can extrude it for you.*

SPRING LOCK FEATURE

Our Fractional and Metric TLOTS structural extrusions have a 2° taper that spring locks fasteners as they are tightened. Fasteners will not loosen, even under heavy vibration.

FASTENER TORQUE SPECIFICATIONS

The table (below) indicates the amount of torque needed in foot lbs. to activate the 2° drop lock feature of the extrusion. The nut and bolt combination is pre-loaded when tightened to the minimum torque rating. The pre-loaded state makes a vibration proof connection.

FASTENER DESCRIPTION	TESTED EXTRUSION	MIN FT LBS TORQUE	MAX FT LBS TORQUE
5/16-18 FBHSCS or BHSCS & Economy T-Nut	1.5" x 1.5"	10	20
Economy T-Slot Stud, Washer & Hex Nut	1.5" x 1.5"	25	30
15s Anchor Fastener & Standard T-Nut	1.5" x 1.5"	15	20
15s End Fastener	1.5" x 1.5"	10	22
1/4-20 FBHSCS or BHSCS & Economy T-Nut	1" x 1"	5	10
10s End Fastener	1" x 1"	5	17
10s Anchor Fastener & Standard T-Nut	1" x 1"	5	17
10-32 SHCS or BHSCS	1" x 1"	9	13

**These fastener torque specifications are to be used as a guide only. The person using this content is to assume all risk. With the many factors that can affect the torque specifications, the only way to determine the correct information is through a series of tests under actual assembly conditions.*

ALUMINUM ALLOY

An aluminum extrusion alloy is a predetermined mixture of one or more elements together with aluminum to be heated and hydraulically pressed through an extrusion die. Some common elements alloyed with aluminum include copper, magnesium, manganese, chromium, silicon, iron, nickel and zinc.

TSLOTS extrusions use the 6560 or equivalent alloy. In addition to aluminum, the major alloying elements for this alloy include: Mg .25-.45% and Si .35-.8%.

ANODIZING

Anodizing is an electrochemical process that thickens and toughens the naturally occurring protective oxide. The resulting finish makes a corrosion resistant extrusion. TSLOTS extrusions have an acid etch anodize finish that is .4-.6 mil. thick. And the anodize is a Type 2 Sulfuric.

REMEMBER – WE CUSTOM EXTRUDE TOO!

TSLOTS can ship you a finished extrusion with your orders. TSLOTS provides the following operations:

- Extrusion
- Machining
- Heat treating
- Warehousing
- Cut to length
- Anodizing
- Painting
- Fabrication
- Engineering assistance
- Punch, slot, countersink

TSLOTS VS. WELDED STEEL

TSLOTS ADVANTAGES

- Linear adjustment in X, Y and Z axis
- No welding
- No painting (unless you want to)
- No rusting
- No cleanup
- No special tools
- No electricity
- Easy modifications
- Add on attachments
- Remove attachments
- Strong support ability
- Linear slide capability
- Comes packed ready to assemble or arrives assembled if desired
- Compatibility with competitors attachments
- Lower cost per project
- Lightweight and easy to use

WELDED STEEL DISADVANTAGES:

- Special equipment, welder
- Welding supplies
- Paint
- Cleaning supplies
- Fabricating equipment
- May rust

WELDED STEEL ADVANTAGES

- Permanent assembly

MAKING CHANGES TO YOUR DESIGN IS EASY!

DEFLECTION CALCULATIONS

Using the calculations below, find your approximate deflection* for a specific TSLOTS extrusion. See table below for variations.

EQUATION VARIABLE UNITS RESPECTIVELY

- Max. Deflection is in inches
- "F" or Force is in pounds
- "L" or Length is in inches
- "E" or Modulus of elasticity is in pounds per inch squared
- "I" or Moment of Inertia is in inches⁴
- "W" or Weight is in pounds per inch

Technical Data & Information

WANT A QUICK QUOTE NOW?

We request that the applicable information below be included in the quote request. This will ensure that we have all the information we need to complete the quote quickly and accurately.

REQUEST TYPE	DIM./DETAILS	EXTRUSION	FASTENERS	PANELS	PANEL MOUNT
BOM (24 hrs)	Outside Dim.	10 Series	Joining Plate	Acrylic	In Slot
Budgetary (1-2d)	Inside Dim.	15 Series	Bracket/Gusset	Polycarbonate	Retainers
Quote (2-3d)	DWG/Model	40 Series	End Fastener	HDPE	Mount Blocks
		B Series	Anchor Fastener	Haircell	Surface Mount
			SHCS fastener	Expanded PVC	

DESIGN REQUIREMENTS

REQUEST TYPE

The quickest way to receive a quote is to provide us with a Bill of Materials. Detailed dimensioned drawings or solid models are preferred and can greatly decrease turnaround time. The complexity of the request is the main determining factor in regards to turnaround time.

DIMENSIONS/DETAILS

Please include as many critical dimensions as possible. The more details you can call out on a drawing, the better. If you don't have a drawing, please specify whether the dimensions you provided are inside critical or outside critical. Not having a drawing or model will increase lead time.

EXTRUSION SELECTION

Knowing this information is one of the quickest ways to get us started. Within each of the series, there are a number of extrusions to choose from. Using part numbers is preferred.

FASTENERS

It is important for us to know how we need to quote the connections. As with everything, the more specific you can be the better. Using part numbers is preferred.

PANELS

We have a variety of panels to choose from. When selecting panel, please specify material, thickness, and color.

PANEL MOUNTING

Panel mounting can be done in a few different ways as listed below. Please choose the best for your application.

ASSEMBLY/KIT

Please specify whether you would like us to assemble the quote or provide it as a kit. If left unspecified, the request will be quoted as a kit.

1. Select profile for building your bi-fold door. Typically the same as the frame.
2. Determine the opening width for your doors.
3. Select your hinge type and identify the hinge gap between profiles for the selected hinge.
4. Choose the total width for each inside door you wish to use, subtract all hinge and clearance gaps.

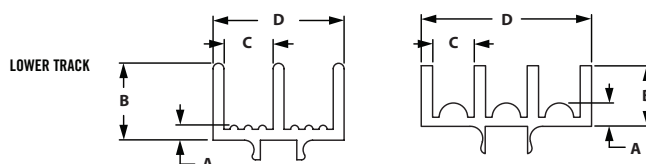

DOOR SLIDE TRACK

- Snaps into T-Slot
- Deeper slot in upper track allows panel to be inserted after frame is assembled
- Radius bearing surface in lower track allows for easier sliding

For panel height subtract
.500" from overall height

Dynamic Hinge Assembly Charts

Our dynamic hinges are made of a 6000 series aluminum alloy. Our dynamic hinges come with pre-lubricated bronze pivot bearings and hardened stripper bolts. The dynamic hinges are designed to give your design a 0 to 180 degrees of axial motion.

AREA CALCULATION MATRIX

HOW TO USE THE MATRIX

- Round both length and width dimensions up to the next 6" increment
- Find the length and width along the top and side of area calculation matrix
- Find the area in square feet at the intersection of the length and width matrix

CALCULATE PANEL SLOT DEPTH

Linear Motion

LINEAR BEARING MACHINING SERVICES

» We recommend applying Linear Brake on the side without the set screw if possible.

» Refer to linear bearing drawings on pages 214-219 for dimensions.

ITEM #	SERIES	DESCRIPTION
660093	10	Brake Machining Service (.281) Hole
660092	15	Brake Machining Service (.328) Hole

To order linear bearing machining services, specify the linear bearing, the machining service and the brake hole location.

When ordering linear bearing machining services, make sure the linear bearing and the machining service are both the same series.

Example - 657095 - 660092 @ C4

Linear Bearing Information

TSLOTS LINEAR BEARINGS

The shimless linear bearing provides accurate linear movement on TSLOTS extrusions. The bearing can be adjusted for the first time on an assembly or adjusted for wear while assembled to the application, providing that the adjustment screws are available to the adjustment tools. No shims, no disassembly, only accurate sliding.

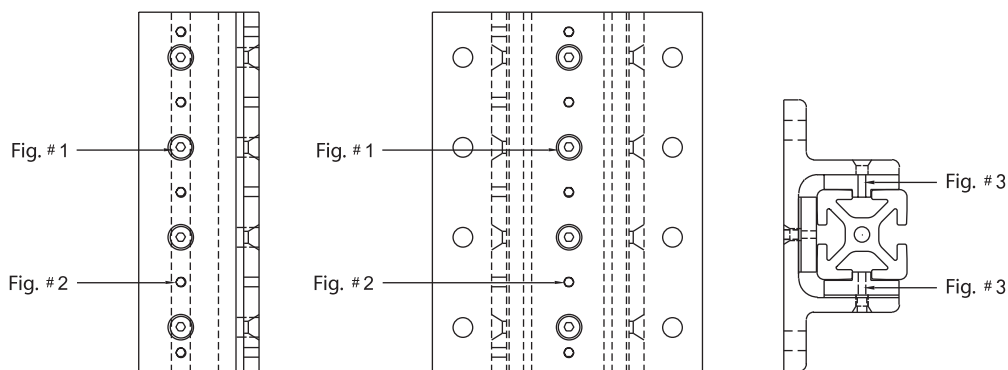

1. Linear Bearing adjustable bearing pads are delivered in the open position. Slide the bearing on the extrusion to be used. (Fit will be loose, because of the open position.)
2. Using a 1/16 allen wrench for a 10 Series linear bearing, and a 3/32 allen wrench for 15 Series linear bearing, loosen the Flathead socket cap screws on each side of the linear bearing incrementally as follows. (Fig. #1)
 - o 10 Series Bearing, 4-40 THREAD
 - o 15 Series Bearing, 8-32 THREAD

**Each flathead screw should be loosened the same amount, to provide even shimming on the extrusion.*

3. Tighten each set screw, using a .050 allen wrench for a 10 Series linear Bearing, and a 5/64 allen wrench for a 15 Series linear bearing, until each flat head screw is properly seated in each countersink. Hint: The amount of turns per set screw will be the same amount as for the flat head socket cap screw. (Fig. #2)

4. For fine tuning: Repeat steps 2 & 3.

**Replacement bearing pads are available through TSLOTS or your distributor. Due to patent requirements, TSLOTS requires all users of the aforementioned product to only replace bearing pads as per the drawing below. Only the opposing sides have keyed bearing pads. (Fig. #3)*

LINEAR BEARING LOAD RATINGS

LINEAR BEARING LOAD RATINGS FOR BOTH ECONOMY AND STANDARD BEARINGS

SERIES	LOAD A	FORCE B
10 S	375 lbs	Force to move = 45 lbs
15 S	500 lbs	Force to move = 60 lbs

**Values are recommended load ratings not to be used for design purposes.*

Linear Bearing Replacement Pads

AREA CALCULATION MATRIX

HOW TO USE THE MATRIX

- Round both length and width dimensions up to the next 6" increment
- Find the length and width along the top and side of area calculation matrix
- Find the area in square feet at the intersection of the length and width matrix

CALCULATE PANEL SLOT DEPTH

20 SERIES - ADD 6MM (.236") TO "A"

30 SERIES - ADD 14MM (.550") TO "A"

40 & 45 SERIES - ADD 21MM (.826") TO "A"

6060 B PROFILE - ADD 22MM (.866") TO "A"

6060 B 8 SLOT PROFILE - ADD 14MM (.550") TO "A"

3030 FG PROFILE - ADD 51.5MM (2.03") TO "A"

3045 FG PROFILE - ADD 39.2MM (1.544") TO "A"

AREA CALCULATION MATRIX

HOW TO USE THE MATRIX

- Round both length and width dimensions up to the next 6" increment
- Find the length and width along the top and side of area calculation matrix
- Find the area in square feet at the intersection of the length and width matrix

CALCULATE PANEL SLOT DEPTH

20 SERIES - ADD 10MM (.392") TO "A"

40 SERIES - ADD 19MM (.75") TO "A"

LINEAR BEARING MACHINING SERVICES

» We recommend applying Linear Brake on the side without the set screw if possible.
 » Refer to linear bearing drawings on pages 214-219 for dimensions.

ITEM #	SERIES	DESCRIPTION
660092	40	Brake Machining Service (.328) Hole

To order linear bearing machining services, specify the linear bearing, the machining service and the brake hole location.
 When ordering linear bearing machining services, make sure the linear bearing and the machining service are both the same series.

Example - 657168 - 660092 @ C4

Linear Bearing Information

TLOTS LINEAR BEARINGS

The shimless linear bearing provides accurate linear movement on TLOTS extrusions. The bearing can be adjusted for the first time on an assembly or adjusted for wear while assembled to the application, providing that the adjustment screws are available to the adjustment tools. No shims, no disassembly, only accurate sliding.

1. Linear Bearing adjustable bearing pads are delivered in the open position. Slide the bearing on the extrusion to be used. (Fit will be loose, because of the open position.)
2. Using a 3/32 allen wrench for 40 Series linear bearing, loosen the Flathead socket cap screws on each side of the linear bearing incrementally as follows. (Fig. #1)

- 40 Series Bearing, 8-32 THREAD

**Each flathead screw should be loosened the same amount, to provide even shimming on the extrusion.*

3. Tighten each set screw, using a 5/64 allen wrench for a 40 Series linear bearing, until each flat head screw is properly seated in each countersink. Hint: The amount of turns per set screw will be the same amount as for the flat head socket cap screw. (Fig. #2)

4. For fine tuning: Repeat steps 2 & 3.

**Replacement bearing pads are available through TLOTS or your distributor. Due to patent requirements, TLOTS requires all users of the aforementioned product to only replace bearing pads as per the drawing below. Only the opposing sides have keyed bearing pads. (Fig. #3)*

09 CONNECT GUARDING & LED LIGHTING

TSLOTS Guarding System

MODULAR GUARDING SYSTEM

CONCEPT

CONNECT™ uses pre-fabricated panels of varying widths and heights that quickly link together to create a custom guarding solution.

ADVANTAGES

SHORT LEAD TIMES

Pre-fabricated panels will allow you to minimize engineering and design time

MODULAR

Need to modify or add something to the guarding? Simply order the additional parts and install as needed on-site

EASY ASSEMBLY AND INSTALLATION

The panels arrive assembled and ready to connect to each other. Simply link them together and fasten to the floor.

SKETCH

Sketch the footprint of the guarding complete with dimensions and doors.

INSTALL

Once your order arrives, connect the pre-fabricated panels using the included hardware, and fasten to the floor.

SUBMIT

Consult with the TSLOTS distributor to determine which panels will work best for your needs.

STANDARD GURADING PANELS

- Connects with Joining Strips
- Assemble in a straight line or at 90 degrees
- 6 inch gap between floor and frame
- Meets OSHA guarding regulations

INDUSTRIAL LED LIGHT BARS

WORKSTATION ILLUMINATION

TSLOTS Industrial Light Bar, utilizes advanced LED lighting technology providing high-quality and maintenance-free industrial lighting solutions that will last for years.

- High brightness with an even light output for a no-glare glow.
- Eye shields to eliminate visual strain and glare.
- Robust metal housing, shatterproof light cover and easy installation.
- Ideal for work stations, machine lighting, control cabinets and manufacturing lines.
- We offer our LED Lights in 2', 3' and 4' lengths.
- Lights are easy to install onto TSLOTS™ extrusions.
- Improves visibility and safety in a workplace or on a machine.
- In stock for immediate shipping.

MACHINING SERVICE

To make machining TSLOTS a simple process, it is necessary to identify the machinable location of the extrusion. For standard services, refer to the drawings on this page for basic identification of each profile.

Some things to keep in mind when ordering machining services:

Where possible, include a drawing with the required machining services.

Remember, if you have us machine your kit for you, it will arrive at your door ready to assemble. Or, if you prefer, we will ship your kit to you pre-assembled, ready to use.

For non-standard machining services, custom prints are required or engineering help is available.

ORDERING NOTES FOR STANDRAD MACHINING SERVICES

CUT TO LENGTH

Specify –

1. The extrusion item number or description
2. The quantity of extrusions
3. The length of the extrusion
4. The machining service number

DRILL ACCESS HOLES

Specify –

1. The extrusion item number or description
2. The number of pieces to be drilled
3. The length of the extrusion
4. The machining service number
5. The slot location at which the feature is required and the distance from end "A"

MITER CUT AND COUNTERBORE

Specify –

1. The extrusion item number or description
2. The number of pieces to be miter cut
3. The length of the extrusion from longest corner to longest corner
4. The machining service number
5. The end(s) at which the machining is required and the face from which a bolt would be installed
6. The degree in which in need it cut to

FURNITURE SYTLE DOOR MILLING

Specify –

1. The extrusion item number or description
2. The number of pieces to be drilled
3. The length of the extrusion
4. The machining service number
5. The slot location at which the feature is required and the distance from end A"

CENTRAL/BOLT CONNECTORS

Specify –

1. The extrusion item number or description
2. The number of pieces to be drilled
3. The length of the extrusion
4. The machining service number
5. The slot location at which the feature is required and the distance from end A"

All other machining services have ordering notes and ordering examples on the page where the machining service is located.

TAPPING

Specify –

1. The extrusion item number or description
2. The number of pieces to be tapped
3. The length of the extrusion
4. The machining service number
5. The end(s) at which the tapped hole is required

COUNTERBORE FOR ANCHOR/BUTT FASTENER ASSEMBLY

Specify –

1. The extrusion item number or description
2. The number of pieces to be counterbored
3. The length of the extrusion
4. The machining service number
5. The end(s) to be machined and the slot location at which the counterbore is required

COUNTERBORE WITH THROUGH HOLE

Specify –

1. The extrusion item number or description
2. The number of pieces to be drilled
3. The length of the extrusion
4. The machining service number
5. The slot location at which the feature is required and the distance from end A"

DELUXE DOOR HANDLE MILLING

Specify –

1. The extrusion item number or description
2. The number of pieces to be drilled
3. The length of the extrusion
4. The machining service number
5. The slot location at which the feature is required and the distance from end A"

BOLT AND CENTRAL CONNECTORS

Specify –

1. The extrusion item number or description
2. The number of pieces to be drilled
3. The length of the extrusion
4. The machining service number
5. The slot location at which the feature is required and the distance from end A"

ORDER EXAMPLE

Your project calls for 15 pieces of 1.5" x 1.5" extrusion and 5 pieces of 1.5" x 3". All 15 pieces of the 1.5" x 1.5" are cut to length and will be machined – 10 pieces @ 55" and 5 pieces @ 24.25" and all 5 pieces of the 1.5" x 3" are miter cut and counterbored – 5 pieces @ 16.35".

In this example there are (3) separate orders that will take place:

- I. 10 pieces of 1.5" x 1.5" @ 55"
- II. 5 pieces of 1.5" x 1.5" @ 24.25" and
- III. 5 pieces of 1.5" x 3" @ 16.35".

**At the end of your machining order, total each machining service on separate lines.

Ex. In Scenario I and II there are 15 Cut To Length charges – 660003 – 15.

The information needed to complete the above order scenario is as follows:

- I. The 10 pieces of 1.5" x 1.5" @ 55":
 - 1a. Extrusion item number or, Description pieces, length
 - 2a. Tapped
 - 3a. Drilled for access holes
- II. The 5 pieces off 1.5" x 1.5" @ 24.25":
 - 1b. Extrusion item number or Description, pieces, length
 - 2b. Tapped
 - 3b. Counterbored
- III. The 5 pieces of 1.5" x 3" @ 16.35":
 - 1c. Extrusion item number or Description, pieces, length
 - 2c. Miter cut and counterbored

Your order would look as follows:

ORDERING NOTES

Cut to length requirements should be described by specifying:

1. The extrusion item number or description
2. The quantity of extrusions
3. The length of the extrusion
4. The machining service number

◦ Tolerance on cuts is +/- .015"

◦ Squareness of cut is .003" per inch max.

EXAMPLE

A project required 8 pieces of 1.5"x1.5", cut to a length of 60" each.

These profiles would be ordered as follows:

ORDERING NOTES

Profile end tapping requirements should be described by specifying:

1. The extrusion item number or description
2. The number of pieces to be tapped
3. The length of the extrusion
4. The machining service number
5. The end(s) at which the tapped hole is required

See page 474 for the drawings of the extrusion ends

This machining service provides one or more tapped holes to your extrusion ends. End tap holes are required for the following fastening and accessories when using extrusion end.

- End Fastener Assembly
- Leveling Feet
- Base Plates
- Anchor Plates
- Caster Mounting Plates
- Pressure Manifold Plates
- Casters

EXAMPLE

You want 4 pieces of the 1.5" x 1.5" @ 30" tapped at each end for the attachment of the 5/16-18 End Fastener Assembly. This machining service would be ordered as follows:

ITEM #	QTY	MACHINING SERVICE NUMBER	LENGTH

DRILL ACCESS HOLE (CONTINUED)

ORDERING NOTES

Access hole requirements should be described by specifying:

1. The extrusion item number or description
2. The number of pieces to be drilled
3. The length of the extrusion
4. The machining service number
5. The slot location at which the feature is required and the distance from end "A"

See page 474 for the correct end and T-Slot location call-outs.

If multiple single hole drillings are required on one profile, they should be called out together with a hyphen (-) separating each drilling location callout. If different access hole drilling services are required on one profile (i.e. 1 x single hole, 1 x 4-hole pattern), they should be called out as separate line items.

EXAMPLE

You want 2 pieces of 1.5 x 1.5" @ 45" to receive a two-hole in-line access hole pattern at both ends, for attachment of a length of 15 x 30. The order would look as follows:

ITEM #	QTY	MACHINING SERVICE NUMBER	LENGTH
650005	2	660106 A1/.75"-A1/44.25"	45"
	2	660003	
	4	660106	

Note that the distance specified in both cases (from the reference end of the profile) will provide a flush connection with the mating extrusion.

ORDERING NOTE

Counterboring requirements should be described by specifying:

1. The extrusion item number or description
2. The number of pieces to be counterbored
3. The length of the extrusion
4. The machining service number
5. The end(s) to be machined and the slot location at which the counterbore is required

See page 474 for information regarding T-Slot location callouts.

When multiple counterbores are needed on one profile, they should all be called out together, with a hyphen (-) separating each end / T-Slot location callout (see example).

- Counterbore is needed to insert the anchor fastener assembly or butt fastener assembly
- Counterbore locations for each extrusion must be specified as shown below.
- Anchor fasteners & butt fasteners are on pages 104 & 382.

EXAMPLE

A project requires that two lengths of profile be machined for an anchor fastener assembly. One of the lengths is the 1.5" x 1.5" @ 41" extrusion profile and requires the counterboring at one end only, in slot A1 and A3 of the profile. The other length is the 1.5" x 3" extrusion profile @ 45" that requires machining for two anchor fasteners at each end, in slot A3-A6 and B3-B6 of the profile only. The counterbore service would be ordered as follows:

ITEM #	QTY	MACHINING SERVICE NUMBER	LENGTH

ORDERING NOTE

Miter cut and counterbore requirements should be described by specifying:

1. The extrusion item number or description
2. The number of pieces to be miter cut
3. The length of the extrusion from longest corner to longest corner
4. The machining service number
5. The end(s) at which the machining is required and the face from which a bolt would be installed
6. The degree in which in need it cut to

Also, indicate the length of the finished profile from longest corner to longest corner. To specify the correct face on a 15 x 30 extrusion profile (where there are multiple T-Slots), specify only one of the T-Slot locations on that face. See page 474 for information on the correct end and T-Slot callouts.

EXAMPLE - Miter Cut:

Two custom support brackets are required for your project, but you plan on counterboring the part yourself. You will use 15 x 30 extrusions that are 15" long from corner to corner. The machining service would look as follows:

ITEM #	QTY	MACHINING SERVICE NUMBER	LENGTH
650008	2	660046 A1-B1	15"

For preassembled 45° supports in 6", 12" and 24" lengths see page 159.

For custom 45° support brackets and other types of brackets, a miter saw cut and counterbore machining service is required.

◦ *Machining tolerance is +/- .030"*

Machining Services

PANELS AND WIRE MESH - CUT TO SIZE

ITEM #	MATERIAL	SERVICE TYPE
660062	Plastic Panels	Cutting Plastic Panels Any Side \leq 48"
660063	Plastic Panels	Cutting Plastic Panels Any Side $>$ 48"
660060	Shear Wire Mesh	Shearing Expanded Metal or Wire Mesh Any Side \leq 48"
660061	Shear Wire Mesh	Shearing Expanded Metal or Wire Mesh Any Side $>$ 48"

ORDERING NOTE

Panel saw cut requirements should be described by specifying the type of panel required and the size required in inches. Pricing is calculated on a square foot basis. The cutting charges will appear as a separate line item.

EXAMPLE

A machine guard project requires 3 clear Lexan® panels, Item number 655433, cut to a size of 4' x 3'. This panel would be ordered as follows:

» *Cut tolerances for panels/wire mesh*
Plastic panels: +/- .125"
Wire Mesh: +.125"/-.250"

ITEM #	QTY	MACHINING SERVICE NUMBER	LENGTH
655433	3	660062 4' x 3'	36 sq. Feet

NOTCH PANEL FOR EXTRUSION CLEARANCE

Panel notching gives clearance for perpendicularly mounted extrusions. This machining service is only needed when panels are installed in TSLOTS.

◦ *Machining tolerance is +/- .030"*

ITEM #	SERIES	TYPE	A
660098	10	Corner Notch	.347"
660099	15/40	Corner Notch	.500"
660212	10/15/40	Universal Clearance Notch	.347/.500"

NOTCH PANEL FOR END FASTENER CLEARANCE

Panel notching gives clearance for end fastener. This machining service is only needed when panels are installed in TSLOTS.

◦ Machining tolerance is +/- .030"

ITEM #	SERIES	TYPE	A	B
660096	10	Corner Notch	.250"	.650"
660097	15/40	Corner Notch	.340"	.650"
660212	10/15/40	Universal Clearance Notch	.250/.340"	.650"

NOTCH PANEL FOR ANCHOR FASTENER CLEARANCE

Panel notching gives clearance for anchor fastener. This machining service is only needed when panels are installed in TSLOTS.

Panel should be installed after the anchor fastener is tightened.

◦ Machining tolerance is +/- .030"

ITEM #	SERIES	TYPE	A	B
660088	10	Corner Notch	.375"	1.063"
660089	15/40	Corner Notch	.500"	1.750"
660212	10/15/40	Universal Clearance Notch	.375/.500"	1.063/1.750"

EXAMPLE:

ITEM# QTY MACHINING SERV
655433 4 660088 A1, 660088 B2, 660088 A4, 660088 B3

NOTE THAT SIDE A IS ALWAYS LONGER THAN SIDE B, AND THE LETTER LISTED IN THE SERVICE INDICATES WHICH DIRECTION THE LONGER NOTCH IS ORIENTED.

CORNER #1 IS ORIENTED BY PLACING THE PANEL AS SHOWN IN THE STD. PANEL EXAMPLE. ALL OTHER CORNERS ARE BASED OFF THIS CORNER BY NUMBERING THE PANEL CLOCKWISE
